Weapons Distribution

The following list shows the weapons which can be found in *Canada* and whether there is data on who holds these weapons:

| AR 15 (M16/M4) | == | U | Lee-Enfield SMLE | | GN |
|------------------------------|----|---|-----------------------|----|----|
| Browning M 2 | | G | M1918 Browning | | U |
| Carl Gustav recoilless rifle | | G | M1919 Browning | | G |
| Colt M1911 | == | U | M203 grenade launcher | | G |
| FN FAL | == | G | MG 3 / MG 42 | | U |
| FN Herstal FN MAG | | G | Remington 870P | | G |
| FN High Power | == | U | SIG SG540 | | GN |
| FN MINIMI | == | G | SIG SG550 | | G |
| FN P90 | _ | G | Simonov SKS | | Ν |
| GDATP MK 19 | | G | Sten gun | == | G |
| Glock 17 | | U | Sterling L2A3 | == | G |
| HK G36 | | G | Thompson M1928 | | G |
| НК МР5 | | G | Webley Mk. IV | | U |

Explanation of symbols

| Ļ. | Country of origin |
|----|---|
| == | Licensed production |
| ¥ | Production without a licence |
| G | Government: Sources indicate that this type of weapon is held by Governmental agencies. |
| Ν | <i>Non-Government</i> : Sources indicate that this type of weapon is held by non-Governmental armed groups. |
| | |

U Unspecified: Sources indicate that this type of weapon is found in the country, but do not specify whether it is held by Governmental agencies or non-Governmental armed groups.

It is entirely possible to have a combination of tags beside each country. For example, if country X is tagged with a G and a U, it means that at least one source of data identifies Governmental agencies as holders of weapon type Y, and at least one other source confirms the presence of the weapon in country X without specifying who holds it.

Note: This application is a living, non-comprehensive database, relying to a great extent on active contributions (provision and/or validation of data and information) by either SALW experts from the military and international renowned think tanks or by national and regional focal points of small arms control entities.

AR 15 (M16/M4)

The heart of the Colt AR-15 is the direct gas system. This system uses no conventional gas piston and rod to propel bolt group back after the shot is fired. Instead, the hot powder gases are fed from the barrel and down to the stainless steel tube into the receiver. Inside the receiver, the rear end of the gas tube enters into the "gas key", a small attachment on the top of the bolt carrier. The hot gases,

through the gas key, enter the hollow cavity inside the bolt carrier, and expands there, acting against the bolt carrier and the collar around the bolt body. The pressure of the gases causes the bolt carrier to move back against initially stationary bolt. The M16 clone CQ/ Terab has been observed in South Sudan used by some rebel groups. The CQ is a variant of the AR-15 rifle manufactured by the Chinese arms company, NORINCO. The "Terab" rifle is a clone of the Norinco CQ manufactured by the MIC (Military Industry Corporation) of Sudan. The "Armada" rifle is a clone of the Norinco CQ manufactured by S.A.M. - Shooter's Arms Manufacturing, a.k.a. Shooter's Arms Guns & Ammo Corporation, in the Philippines. The CQ/ Terab has been observed in South Sudan used by some rebel groups in 2013.

| Category | Assault Rifles | |
|------------------|------------------------------|--|
| Operating system | Gas operated, rotating bolt | |
| Cartridge | 5.56 x 45mm / .223 Remington | |
| Length | 986 mm | |
| Feeding | Box magazine | |

The following ammunition can be used by the **AR 15 (M16/M4)**:

5.56 x 45mm / .223 Remington

| Bullet diameter | 5.7 mm |
|-----------------|---------|
| Case length | 44.7 mm |
| Overall length | 57.4 mm |

Browning M 2

The Browning .50 caliber machine gun has been used extensively as a vehicle weapon and for aircraft armament. The M2 fires from a closed bolt, operated on the short recoil principle. Nearly 5 million items were produced.

| Category | Heavy Machine Guns | | |
|------------------|---|--|--|
| Operating system | Fires from a short bolt, operated on the short recoil principle | | |
| Cartridge | 12.7 x 99 mm NATO (.50BMG) | | |
| Length | 1650 mm | | |
| Feeding | Belt | | |

The following ammunition can be used by the **Browning M 2**:

12.7 x 99 mm NATO (.50BMG)

| Bullet diameter | 13 mm |
|-----------------|--------|
| Case length | 99 mm |
| Overall length | 138 mm |

NO IMAGE

Carl Gustav recoilless rifle

The Carl Gustav can be fired from the standing, kneeling, sitting or prone positions. A bipod may be attached in front of the shoulder piece. An operating handle called a "Venturi lock" is used to move the hinged breech to one side for reloading. The weapon is normally operated by a two-man crew, one carrying and firing the weapon, the other carrying ammunition and reloading.

| Category | Recoilless Guns/Rifles |
|------------------|------------------------|
| Operating system | Recoilless launch |
| Cartridge | |
| Length | 1130 mm |
| Feeding | hinged breech |

The following ammunition can be used by the **Carl Gustav recoilless rifle**:

Colt M1911

Technically, the M1911, also known as Colt Government, is a recoil operated, locked breech semi-auto pistol. It has single action trigger with frame mounted safety that locks the hammer and the slide. Hammer could be locked either in cocked or in lowered position, allowing the gun to be carried in "cocked and locked" state, with safety on, hammer cocked and round chambered. Additional automated safety incorporated

into rear of the grip and locks the action when gun not held in the hand properly. The M 1911 was manufactured by many companies in many countries, partly in the original form, partly modified, partly under license and partly without a license. It was exported to many countries after WW II, and it was in service with the US armed forces for more then 70 years.

| Category | Self-Loading Pistols & Revolvers | |
|------------------|---|--|
| Operating system | Short recoil operated, closed breech, single action, semi-automatic | |
| Cartridge | .45 ACP | |
| Length | 219 mm | |
| Feeding | Box magazine | |

The following ammunition can be used by the **Colt M1911**:

.45 ACP

| Bullet diameter | 11.5 mm |
|-----------------|---------|
| Case length | 22.8 mm |
| Overall length | 32 mm |

FN FAL

The FN FAL (Fusil Automatique Léger - Light Automatic Rifle) is one of the most famous and widespread military rifle. Because of its prevalence and widespread usage among the

militaries of many NATO and first world countries during the Cold War, it received the title "The right arm of the Free World". It can be found in both, the 7.62x51mm and, very rarely, the 5.56x45mm NATO versions. The furniture may be wood, metal or plastic. There are various barrel lengths. In the UK (L1A1), Canadian, Indian and Netherland versions, there is no automatic fire mode. The gas system is fitted with gas regulator so it could be easily adjusted for various environment conditions, or cut off completely so rifle grenades could be safely launched from the barrel.

| Category | Assault Rifles |
|------------------|---|
| Operating system | Gas operated, tilting breechblock, select-fire or semi-automatic only |
| Cartridge | 7.62 x 51mm / .308 Winchester |
| Length | 1100 mm |
| Feeding | Box magazine |

The following ammunition can be used by the **FN FAL**:

7.62 x 51mm / .308 Winchester

| Bullet diameter | 7.82 mm |
|-----------------|----------|
| Case length | 51.18 mm |
| Overall length | 69.85 mm |

FN Herstal FN MAG

The Belgian FN MAG (Mitrailleuse d'Appui Général, meaning general-purpose machine gun) entered into production in 1958. It is one of the most widespread machine gun designs and is used in more than 90 countries around the globe. It is still manufactured in Belgium and produced under license in several countries including Argentina, Egypt, the US and the

UK. It can be carried by infantry and is usually fired while mounted on a tripod.

| Category | Heavy Machine Guns | |
|------------------|--------------------------------|--|
| Operating system | gas, automatic | |
| Cartridge | 7.62 x 51mm / .308 Winchester | |
| Length | 1260 mm | |
| Feeding | disintegrating metal link belt | |

The following ammunition can be used by the **FN Herstal FN MAG**:

7.62 x 51mm / .308 Winchester

| Bullet diameter | 7.82 mm |
|-----------------|----------|
| Case length | 51.18 mm |
| Overall length | 69.85 mm |

FN High Power

The High Power is one of the most widely used military pistols of all time, having been used by the armed forces of over 50 countries. The pistol is often referred to as an HP (for "Hi Power" or "High Power") or as a GP (for the French term, "Grande Puissance"). Technically, the High Power pistol, also known as Browning HP 35, GP 35 or Model 1935, is a recoil operated, locked breech pistol. It uses linkless barrel to slide locking invented by Browning. The

trigger is single action, with external hammer. Original HPs featured frame mounted safety at the left side of the frame, that locks both sear and slide. Modern versions, since Mark II, also featured ambidextrous safety levers, that are also more comfortable to operate.

| Category | Self-Loading Pistols & Revolvers |
|------------------|---|
| Operating system | Short recoil operated, locked breech, single action |
| Cartridge | .40 S&W 9mm Parabellum (9 x 19mm) |
| Length | 200 mm |
| Feeding | Box magazine |

The following ammunition can be used by the **FN High Power**:

.40 S&W

| Bullet diameter | 10.2 mm |
|-----------------|---------|
| Case length | 21.6 mm |
| Overall length | 28.8 mm |

9mm Parabellum (9 x 19mm)

| Bullet diameter | 9 mm |
|-----------------|----------|
| Case length | 19.15 mm |
| Overall length | 29.69 mm |

FN MINIMI

The development of the Belgian FN Herstal MINIMI began in the early 1960s, but it did not enter into production until 1982. Since then, the MINIMI light machine gun has been in service in more than 35 countries including in the armies of the US and the UK. The gas-operated MINIMI is one of the most widely used guns in its class and caliber. It is usually belt fed and fired from a bipod, but it can also be fed by magazine and mounted on a tripod.

| Category | Light Machine Guns |
|-------------------------|---|
| Operating system | gas, automatic only |
| Cartridge | 5.56 x 45mm / .223 Remington 7.62 x 51mm / .308 Winchester |
| Length | 1040 mm |
| Feeding | disintegrating metal link belt or box magazine (M16 type) |

The following ammunition can be used by the **FN MINIMI**:

5.56 x 45mm / .223 Remington

| Bullet diameter | 5.7 mm |
|-----------------|---------|
| Case length | 44.7 mm |
| Overall length | 57.4 mm |

7.62 x 51mm / .308 Winchester

| Case length | 51.18 mm |
|----------------|----------|
| Overall length | 69.85 mm |

FN P90

A personal defense weapon (often abbreviated PDW) is a compact semi-automatic or fully-automatic firearm similar in most respects to a submachine gun, but firing an (often proprietary) armor-piercing round, giving a PDW better range, accuracy and armor-penetrating capability than submachine guns, which fire pistol-caliber cartridges.The P90 was designed to have a length no greater than a man's

shoulder width, in order to be easily carried and maneuvered in tight spaces, such as the inside of an armored vehicle. To achieve this, the weapon's design utilizes the unconventional bullpup configuration, in which the action and magazine are located behind the trigger and alongside the shooter's face, so that there is no wasted space in the stock. The P90's dimensions are also minimized by its unique horizontally mounted feeding system, wherein the box magazine sits parallel to the barrel on top of the weapon's frame. Overall, the weapon has an extremely compact profile.

| Category | Submachine Guns |
|------------------|--------------------------------|
| Operating system | Straight blowback, closed bolt |
| Cartridge | FN 5.7 x 28mm |
| Length | 500 mm |
| Feeding | n/a |

The following ammunition can be used by the **FN P90**:

FN 5.7 x 28mm

| Bullet diameter | 5.7 mm | NO IMAGE |
|-----------------|----------|----------|
| Case length | 28.83 mm | NO IMAGE |
| Overall length | 40.5 mm | |

The FN 5.7×28mm is a small-caliber, high-velocity cartridge designed and manufactured by FN Herstal in Belgium. It is a bottlenecked centerfire cartridge that is somewhat similar to the .22 Hornet or .22 K-Hornet. The 5.7×28 mm was developed in conjunction with the FN P90 personal defense weapon (PDW) and FN Five-seven pistol, in response to NATO

requests for a replacement for the 9×19mm Parabellum cartridge. By 2006, FN's 5.7×28mm firearms—the P90 personal defense weapon and Five-seven pistol—were in service with military and police forces in over 40 nations throughout the world. In the United States, 5.7×28mm firearms are currently used by numerous law enforcement agencies, including the U.S. Secret Service.

GDATP MK 19

The MK 19 or Mark 19 grenade machine gun was designed in the 1960s for the US Navy in the Vietnam War. In the following decades, the MK 19 was further improved, sold to and adopted by at least 28 other nations including Australia, Chile and South Korea. It was originally designed to be mounted on (naval) vehicles, but current systems can also be ground- or turretmounted. The MK 19 can be fired manually or even remotely.

Original manufacturer General Dynamics Armament and Technical Products (GDATP).

| Category | Hand-held under-barrel and Mounted Grenade Launchers | |
|------------------|--|--|
| Operating system | blowback, open-bolt (advanced primer ignition in mods 1 and 2) | |
| Cartridge | 40x53 mm | |
| Length | 1095 mm | |
| Feeding | linked belt with 32 or 48 rds | |

The following ammunition can be used by the **GDATP MK 19**:

40x53 mm

| Bullet diameter | 40 mm |
|-----------------|-------|
| Case length | 53 mm |
| Overall length | - |

NO IMAGE

Glock 17

Several modified versions of the Glock 17 have also been introduced. The Glock 17C incorporated slots cut in the barrel and slide to compensate for muzzle rise and recoil. The Glock 17L incorporates a longer slide and extended barrel. Initially, the Glock 17L had three holes in the top of the barrel and a corresponding slot in the slide; however, later production pistols

lack the holes in the barrel. The Glock 17MB is a version with ambidextrous magazine catch. Glock pistols are designed with three independent safety mechanisms to prevent accidental discharge. The system, designated "Safe Action" by Glock, consists of an external integrated trigger safety and two automatic internal safeties: a firing pin safety and a drop safety. The external safety is a small inner lever contained in the trigger.

| Category | Self-Loading Pistols & Revolvers | |
|------------------|--------------------------------------|--|
| Operating system | short recoil-operated, locked breech | |
| Cartridge | 9mm Parabellum (9 x 19mm) | |
| Length | 186 mm | |
| Feeding | Box magazine | |

The following ammunition can be used by the **Glock 17**:

9mm Parabellum (9 x 19mm)

| Bullet diameter | 9 mm |
|-----------------|----------|
| Case length | 19.15 mm |
| Overall length | 29.69 mm |

HK G36

The G36 was developed in the 1990s and adopted by several armed forces, e.g. the German Bundeswehr and the Spanish Armed Forces. It is gas-operated and employs a rotating bolt and multi-lug locking system, in contrast to traditional Heckler & Koch delayed roller-locked bolt systems. The butt-stock folds to the right. In 2012, reports about overheating G36 rifles in Afghanistan surfaced which affected the G36's accuracy. In April 2015, the German Ministry of Defence decided that the G36 would be phased out.

| Category | Assault Rifles |
|------------------|----------------------------------|
| Operating system | gas, selective-fire |
| Cartridge | 5.56 x 45mm / .223 Remington |
| Length | 1002 mm |
| Feeding | detachable, polymer box magazine |

The following ammunition can be used by the **HK G36**:

5.56 x 45mm / .223 Remington

| Bullet diameter | 5.7 mm | |
|-----------------|---------|----------------------|
| Case length | 44.7 mm | |
| Overall length | 57.4 mm | N= mm 1 cm 2 3 4 5 6 |

HK MP5

Though the Heckler & Koch MP5 was designed in the 1960s, it is still one of the most widely deployed sub-machine guns and has been developed into a family with numerous variants. The gun features either a fixed or a sliding (telescoping) butt-stock. The original MP5 offers a choice of single shot or automatic fire,

whereas later models received a burst-fire device, allowing two or three-round-bursts each time the trigger is operated. Current models remain in (licensed) production in several countries, though The China North Industries Corporation, officially abbreviated as Norinco, manufactures an unlicensed copy, the NR08.

| Category | Submachine Guns | |
|------------------|----------------------------------|--|
| Operating system | delayed-blowback; selective-fire | |
| Cartridge | 9mm Parabellum (9 x 19mm) | |
| Length | 680 mm | |
| Feeding | detachable box magazine | |

The following ammunition can be used by the **HK MP5**:

9mm Parabellum (9 x 19mm)

| Bullet diameter | 9 mm |
|-----------------|----------|
| Case length | 19.15 mm |
| Overall length | 29.69 mm |

Lee-Enfield SMLE

Rifles manufactured in the USA may have "UNITED STATES PROPERTY" on the left side of the receiver. Some of the Indian-made weapons can be found using 7.62 NATO caliber. The Lee-Enfield family of rifles is the oldest bolt-action rifle design still in official service. Lee-Enfield rifles are used by reserve

forces and police forces in many Commonwealth countries, particularly Canada, where they are the main rifle issued to the Canadian Rangers, and India, where the Lee-Enfield is widely issued to reserve military units and police forces. Many Afghan participants in the Soviet invasion of Afghanistan were armed with Lee-Enfields (a common rifle in the Middle East and South Asia).

| Category | Rifles & Carbines | |
|------------------|----------------------------------|--|
| Operating system | Manually operated, rotating bolt | |
| Cartridge | 7.7 x 56mm R / .303 British | |
| Length | 1130 mm | |
| Feeding | Box magazine | |

The following ammunition can be used by the **Lee-Enfield SMLE**:

7.7 x 56mm R / .303 British

| Bullet diameter | 7.9 mm |
|-----------------|---------|
| Case length | 56.4 mm |
| Overall length | 78.1 mm |

M1918 Browning

The M1918 was produced between 1917 and 1945 originally in the US, but it is also produced in countries such as Belgium, Poland, Sweden and China. It remained in use

by the US military until the 1970s. The name affix of the M1918 "BAR" means "Browning Automatic Rifle" and refers to the original designer John M. Browning, not to the actual manufacturer.

| Category | Light Machine Guns | |
|------------------|---|--|
| Operating system | gas operated, rising bolt lock | |
| Cartridge | .30-06 M1 7.62 x 51mm / .308 Winchester 7.7 x 56mm R / .303 British 7.92x57 mm (8x57 IS) | |
| Length | 1200 mm | |
| Feeding | 20-round detachable box magazine | |

The following ammunition can be used by the **M1918 Browning**:

.30-06 M1

| Bullet diameter | 7.8 mm |
|-----------------|---------|
| Case length | 63.3 mm |
| Overall length | 85 mm |

7.62 x 51mm / .308 Winchester

| Bullet diameter | 7.82 mm |

7.92x57 mm (8x57 IS)

| Bullet diameter | 8.08 mm |
|-----------------|---------|
| Case length | 57 mm |
| Overall length | 82 mm |

M1919 Browning

The M1919 is still used by many countries as a vehicle gun, but it is no longer produced in the US. It was originally used as a fixed gun in tanks during the Second World War, but it was also mounted on a tripod and used by infantry. The name affix of the M1919 "BAR" means "Browning Automatic Rifle" and refers to the

original designer John M. Browning, not to the actual manufacturer. Variants of the M1919 are the A1; A2; A3; A4; A5; A6; M37 and AN/M2.

| Category | Light Machine Guns |

|-----------------|--------|
| Case length | 25 mm |
| Overall length | 34 mm |

M203 grenade launcher

The M203 grenade launcher was intended to be used as close fire support for point and group area targets. The round is designed to be effective at penetrating windows, blowing up doors, producing casualties in groups of enemies, destroying bunkers, and damaging or disabling soft-skinned vehicles. Its primary purpose is to engage enemies in dead space that cannot be reached by direct fire. A well-trained M203 gunner can also use his weapon to suppress the enemy, both from movement and sight. M203 were also produced in Egypt, South Korea and Bulgaria (as UBGL-M1, with mount suitable for Kalashnikov AKM and AK-74 type rifles).

NO IMAGE

MG 3 / MG 42

The MG is a short-recoil operated, air cooled, belt fed weapon which fires from an open bolt. The barrel is quick-removable, and can be replaced in less than six seconds by a properly trained crew. The action of the weapon is

operated by the recoil of the locked barrel, assisted by a muzzle booster which uses pressure from the muzzle blast to increase the recoil impulse. This is a simple and solid system. Variants: MG 1: Rheinmetall variant of the MG 42, most notably rechambered to fire 7.62×51mm NATO. MG 1A1 (MG 42/58): As MG 1, but with sights properly calibrated for the new round. Sights refitted to existing MG 1s. MG 1A2 (MG 42/59): MG 1A1 variant; product improved with longer ejection port, heavy bolt and friction ring buffer. MG 1A3: MG 1A2 variant; product improvement of all major components. MG 1A4: MG 1 variant; for fixed mount armor use. MG 1A5: MG 1A3 variant; MG1A3s converted to MG1A4 standard. MG 2: Designation for all wartime MG 42s rechambered to 7.62×51mm NATO. MG 3: MG 1A3 variant; product improved with AA rear sight. MG 3E: MG 3 variant; reduced weight model (roughly 1.3 kg lighter), entered into late 1970s NATO small arms trials. MG 3A1: MG 3 variant; for fixed mount armor use.

|------------------|--------------------------------|
| Operating system | recoil-operated, roller locked |
| Cartridge | |
| Feeding | belt fed |

The following ammunition can be used by the MG 3 / MG 42:

Remington 870P

The Remington Model 870 pump-action shotgun is available in 11 versions with various barrel lengths, furniture alternatives and magazine capacities. The first model entered into production in 1951. Current

models are still being produced today, adding to the more than 10,000,000 estimated units already produced. The Model 870P is the police model with its receiver made of steel. This model can also carry four extra rounds of ammunition. The Remington 870 series is in service with numerous military and police forces worldwide.

| Category | Rifles & Carbines |

SIG SG540

The Swiss SIG SG540 was designed as a potential replacement for the SG510. It was produced between 1977 and 2002 in Switzerland and remains in production in Chile only. While the SG540 and the SG 543 models are chambered for the 6.56 x 45 mm caliber, the SG542 uses 7.62 x 51 mm NATO cartridges.

| Category | Assault Rifles |
|------------------|------------------------------|
| Operating system | gas, selective-fire |
| Cartridge | 5.56 x 45mm / .223 Remington |
| Length | 950 mm |
| Feeding | detachable box magazine |

The following ammunition can be used by the SIG SG540:

5.56 x 45mm / .223 Remington

| Bullet diameter | 5.7 mm |
|-----------------|---------|
| Case length | 44.7 mm |
| Overall length | 57.4 mm |

SIG SG550

The Swiss SIG SG550 assault rifle is based on the SG540. It entered into production in 1981 and is also known as the Fass 90 (Fusil d'assaut 90/Fucile d'assalto 90) in French/ Italian or Stgw 90 in German (Sturmgewehr

90). As special attention was paid to making it lighter, the butt, handguard and magazine are largely made of plastic.

5.56 x 45mm / .223 Remington

| Bullet diameter | 5.7 mm |
|-----------------|---------|
| Case length | 44.7 mm |
| Overall length | 57.4 mm |

Simonov SKS

SKS is a self-loading Carabine. It utilizes a shortstroke gas piston with its own return spring, and a tilting bolt locking, where a bolt tips down to lock onto the floor of the receiver. Charging handle is attached to the right side of the bolt carrier and moves when gun is fired. Safety switch is located inside the trigger guard. The early model 50

weapons are shorter and are usually found without the bayonet. The SKS was an extremely reliable, simple constructed weapon with two unique distinguishing characteristics: a permanently attached folding bayonet, and a hinged non-detachable magazine. However, it was incapable of fully automatic fire and limited by its ten round magazine capacity, and was rendered obsolescent by the introduction of the AK-47 in the 1950s. The SKS was only briefly a standard infantry weapon in front-line units of the Soviet Armed Forces before being replaced by the AK-47 . The weapon was in service with several armed forces, both regular and irregular, and it can be found in many countries in Asia and Africa. The SKS remains popular on the civilian market as a hunting and marksmanship arm in many countries, including the United States and Canada.

| Overall length | 56 mm |

Sten gun

Prior to 1941 UK was keen to produce a own submachine gun as an alternative Rate of fire 550 450 550 600 rounds per minute to the US-Thompson submachine gun. Royal Small Arms Factory, Enfield designed the STEN gun. In the beginning, unreliable but extremely cheap and

easy to produce. After further development, the guns of 1942 and beyond were, in general, highly effective weapons. In Germany, the STEN models "Potsdam" and "Neumünster" were manufactured during WW II. In late 1944, the Mauser works in Germany secretly started manufacturing copies of British Mk II Sten, apparently for diversion and sabotage purposes. These weapons were intended to duplicate the British original as closely as possible, right down to the markings. Also, during WW II some resistance groups in German-occupied countries (DNK, FRA, NOR, POL) produced significant numbers of Stens.

| Category | Submachine Guns | |
|------------------|---|--|
| Operating system | Blowback-operated, fired from open bolt | |
| Cartridge | 9mm Parabellum (9 x 19mm) | |
| Length | 895 mm | |
| Feeding | Box magazine | |

The following ammunition can be used by the **Sten gun**:

9mm Parabellum (9 x 19mm)

Bullet diameter 9 mm

| Case length | 19.15 mm |
|----------------|----------|
| Overall length | 29.69 mm |

Sterling L2A3

Sterling submachine guns , were purchased in more than 70 countries. However, it must be noted that these weapons were rather popular among British troops because of their relatively compact size, adequate firepower and accuracy and good reliability. Special "high power, submachine-gun only" ammunition was procured by British army for Sterling submachine guns. This ammunition was absolutely safe in

Sterling submachine guns, but can cause extensive wear to many 9mm pistols designed for commercial 9x19mm ammunition.

| Category | Submachine Guns | |
|------------------|--|--|
| Operating system | Blowback-operated, select-fire, fires from open bolt | |
| Cartridge | 9mm Parabellum (9 x 19mm) | |
| Length | 481 mm | |
| Feeding | Box magazine | |

The following ammunition can be used by the **Sterling L2A3**:

9mm Parabellum (9 x 19mm)

| Bullet diameter | 9 mm |
|-----------------|----------|
| Case length | 19.15 mm |
| Overall length | 29.69 mm |

Thompson M1928

The American Thompson M1928 was produced between 1921 and 1945. The submachine gun, also known as the "Tommy Gun", was popular amongst civilians, police, and criminals and military alike because of its large .45 ACP cartridges, accuracy, and high volume of automatic fire. Approximately 2,000,000 units have been produced and also exported to numerous countries worldwide.

| Category | Submachine Guns |
|------------------|-------------------------------|
| Operating system | blowback operated, automatic |
| Cartridge | .45 ACP |
| Length | 857 mm |
| Feeding | drum magazine or box magazine |

The following ammunition can be used by the **Thompson M1928**:

.45 ACP

| Bullet diameter | 11.5 mm |
|-----------------|---------|
| Case length | 22.8 mm |
| Overall length | 32 mm |

Webley Mk. IV

The Webley Mk. IV was a standard issue service pistol for the armed forces of the United Kingdom and British Empire and Commonwealth for over 70 Years. All Webley top-beak revolvers featured two piece frame, which hinges ("breaks") down at the forward low end for ejection and loading. The ejector is actuated automatically when the frame is broken open, simultaneously removing all six cases from the cylinder.

The cartridges then can be inserted by hand. In the case of revolver being rechambered for .45ACP round, half- moon clips are used to load the gun (two clips, each for 3 rounds).

Category

Self-Loading Pistols & Revolvers

| Operating system | Double action revolver |
|------------------|------------------------|
| Cartridge | .455 British Service |
| Length | 286 mm |
| Feeding | Cylinder |

The following ammunition can be used by the **Webley Mk. IV**:

.455 British Service

| Bullet diameter | 11.5 mm |
|-----------------|---------|
| Case length | 19.6 mm |
| Overall length | 31.2 mm |

Ammunition head stamps

The following is a non-comprehensive overview of ammunitions head stamps used within this country for ammunition marking.

Tagging of Sources

We believe that our Guide should be as transparent as possible without endangering the confidentiality of our sources. Rather than name the exact source for each unit of data, we have created tags so that users can at least know whether the data comes from a primary or secondary source, and by which medium it can or has been found. All incoming data is validated and then tagged by the project team at BICC before it enters our database.

Sources are tagged according to the following criteria:

1. Primary Sources:

These are presentations of facts. They are proof of an SALW event (e.g. a transfer, sighting, misuse, etc.) because the source was created at the time of the event itself. Primary sources as usually original documents such as transfer authorizations, firearms legislation, or academic journals presenting results of a study on SALW holdings in a particular country, for example. However, they can also be information offered by a person with direct knowledge of an SALW event or who has documented an SALW event at the time that it happened.

2. Secondary Sources:

These are interpretations or evaluation of facts. Secondary sources contain commentary and analysis of SALW events that are documented in primary sources.

Sources are also tagged according to the dominant medium of delivery:

- **A. Written** the source is based on written words.
- **B. Oral** the source is based on spoken words.
- **C. Visual** the source is based on seen events or optical images.

These criteria make our tags two-dimensional. While the process of classifying sources is a primarily subjective one, the project team at BICC has developed the following table to serve as an example of possible sources within each category.

Table: Examples of sources on SALW distribution

| | Primary | Secondary |
|---------|--|--|
| Written | Fact books Weapons Transfer authorizations End-user certificates Transcripts of interviews, legal proceedings, speeches/ presentations, meetings, conferences or symposia Newspaper articles Written correspondence (e.g. letters, emails, text messages, etc.) Blogs Peer-reviewed journal articles Treaties, constitution, laws Records of organizations (e.g. annual reports) Surveys, questionnaires | Wikipedia Literature reviews Training or safety manuals on gun control, ammunition, physical stockpile security management) Minutes of meetings, conferences, symposia Indexes (e.g. Global Militarization Index) Newspaper articles Etc. |

| Oral | Interviews with experts, including radio or telephone Legal proceedings Speeches or interventions by experts or national representatives in government or international meetings | Speeches, panel presentations, etc. on data provided by experts Etc |
|--------|--|--|
| Visual | Artifacts (e.g. the weapons themselves, ammunition) Photographs of weapons, ammunition, etc. Videos (e.g. YouTube, those recorded by mobile phone) Television documentaries, news reports | PowerPoint presentations on results found by experts Etc |

Table: Example tags

| Source (sample) | Type of source | Medium of delivery |
|---|-------------------|-----------------------|
| IHS Jane's Weapons Infantry (2015-2016) | primary | written |
| Panel discussion of weapons use of non-state armed groups | secondary | oral |
| Documentary on paramilitaries in Colombia | primary | visual |

About the Guide

The Interactive Guide on **Small Arms and Light Weapons** is an open access tool, designed to build knowledge on how to identify different types, makes and models of commonly used SALW in organized violence; to collect data on the global and country-specific spread of these SALW; and to describe some of their visual and technical specifications.

The guide is not an exhaustive list of all SALW that are used around the world.

Global SALW control relies on, among other things, data and knowledge of the weapons themselves. Our aim is that the Guide will be used to support national reporting duties on SALW holdings; facilitate and ameliorate the collection of data on SALW; and increase general knowledge of global distribution of SALW.

The interactive Guide was developed by **BICC** in close cooperation with the **Bundeswehr Verification Center** (BwVC), and with the generous support of the *Federal Foreign Office*, *Germany*.
