Country report

<https://salw-guide.bicc.de>

Weapons Distribution

The following list shows the weapons which can be found in *Djibouti* and whether there is data on who holds these weapons:

| | | | |
|-------------------|------------------------------------------------------------------------------------|-----------------|--------------------------------------------------------------------------------------|
| AK-47 / AKM |  | MAS 49/56 |  |
| AR 15 (M16/M4) |  | MAT 49 |  |
| Browning M 2 |  | Mossberg 500 |  |
| Daewoo K1 / K2 |  | Norinco Type 81 |  |
| FAMAS F1 |  | RPD |  |
| FN FAL |  | RPG 2 |  |
| FN Herstal FN MAG |  | RPG 7 |  |
| GDATP MK 19 |  | RPK |  |
| HK G3 |  | SIG SG540 |  |
| MAS 49 |  | Steyr AUG |  |

Explanation of symbols

Country of origin

Licensed production

Production without a licence

Government: Sources indicate that this type of weapon is held by Governmental agencies.

Non-Government: Sources indicate that this type of weapon is held by non-Governmental armed groups.

Unspecified: Sources indicate that this type of weapon is found in the country, but do not specify whether it is held by Governmental agencies or non-Governmental armed groups.

It is entirely possible to have a combination of tags beside each country. For example, if country X is tagged with a G and a U, it means that at least one source of data identifies Governmental agencies as holders of weapon type Y, and at least one other source confirms the presence of the weapon in country X without specifying who holds it.

Note: This application is a living, non-comprehensive database, relying to a great extent on active contributions (provision and/or validation of data and information) by either SALW experts from the military and international renowned think tanks or by national and regional focal points of small arms control entities.

AK-47 / AKM

The AK 47 (Designed 1946-1948) is best described as a hybrid of previous rifle technology innovations: the trigger, double locking lugs and unlocking raceway of the M1 Garand/M1 carbine, the safety mechanism of the John Browning designed Remington Model 8 rifle, and the gas system and layout of the Sturmgewehr 44. There are many variants. The weapons are used by the former Warsaw Pact countries, and they are still in service with numerous armed forces, both regular and irregular. The model and its variants remain the most popular and widely used rifles in the world because of its reliability under harsh conditions, low production costs.

| | |
|-------------------------|-----------------------------------------|
| Category | <i>Assault Rifles</i> |
| Operating system | Gas operated, rotating bolt with 2 lugs |
| Cartridge | 7.62 x 39mm |
| Length | 870 mm |
| Feeding | Box magazine |

The following ammunition can be used by the **AK-47 / AKM**:

7.62 x 39mm

| | |
|-----------------|---------|
| Bullet diameter | 7.92 mm |
| Case length | 38.7 mm |
| Overall length | 56 mm |

AR 15 (M16/M4)

The heart of the Colt AR-15 is the direct gas system. This system uses no conventional gas piston and rod to propel bolt group back after the shot is fired. Instead, the hot powder gases are fed from the barrel and down to the stainless steel tube into the receiver. Inside the receiver, the rear end of the gas tube enters into the "gas key", a small attachment on the top of the bolt carrier. The hot gases,

through the gas key, enter the hollow cavity inside the bolt carrier, and expands there, acting against the bolt carrier and the collar around the bolt body. The pressure of the gases causes the bolt carrier to move back against initially stationary bolt. The M16 clone CQ/ Terab has been observed in South Sudan used by some rebel groups. The CQ is a variant of the AR-15 rifle manufactured by the Chinese arms company, NORINCO. The "Terab" rifle is a clone of the Norinco CQ manufactured by the MIC (Military Industry Corporation) of Sudan. The "Armada" rifle is a clone of the Norinco CQ manufactured by S.A.M. - Shooter's Arms Manufacturing, a.k.a. Shooter's Arms Guns & Ammo Corporation, in the Philippines. The CQ/ Terab has been observed in South Sudan used by some rebel groups in 2013.

| | |
|-------------------------|------------------------------|
| Category | <i>Assault Rifles</i> |
| Operating system | Gas operated, rotating bolt |
| Cartridge | 5.56 x 45mm / .223 Remington |
| Length | 986 mm |
| Feeding | Box magazine |

The following ammunition can be used by the **AR 15 (M16/M4)**:

5.56 x 45mm / .223 Remington

| | |
|-----------------|---------|
| Bullet diameter | 5.7 mm |
| Case length | 44.7 mm |
| Overall length | 57.4 mm |

Browning M 2

The Browning .50 caliber machine gun has been used extensively as a vehicle weapon and for aircraft armament. The M2 fires from a closed bolt, operated on the short recoil principle. Nearly 5 million items were produced.

| | |
|-------------------------|-----------------------------------------------------------------|
| Category | <i>Heavy Machine Guns</i> |
| Operating system | Fires from a short bolt, operated on the short recoil principle |
| Cartridge | 12.7 x 99 mm NATO (.50BMG) |
| Length | 1650 mm |

| | |
|----------------|------|
| Feeding | Belt |
|----------------|------|

The following ammunition can be used by the **Browning M 2**:

12.7 x 99 mm NATO (.50BMG)

| | |
|-----------------|--------|
| Bullet diameter | 13 mm |
| Case length | 99 mm |
| Overall length | 138 mm |

Daewoo K1 / K2

The South Korean Daewoo K1A was developed as a short-barrelled version of the K2 assault rifle explaining their technical and physical resemblance. The K1A is the enhanced version of the previous mass produced K1 rifle. Furthermore, the rifles combine technical elements of the operating systems from the AR15/M16-rifles and the AK-series. Both the K1 and K2 are still in production and in service within the South Korean Armed Forces. *length depends on the model: - Daewoo K1A: 838 mm stock extended - Daewoo K2: 980 mm butt extended*

| | |
|-------------------------|-------------------------------------------|
| Category | <i>Assault Rifles</i> |
| Operating system | gas piston, selective fire with 3rd burst |
| Cartridge | 5.56 x 45mm / .223 Remington |
| Length | 838 mm |
| Feeding | detachable, box magazine |

The following ammunition can be used by the **Daewoo K1 / K2**:

5.56 x 45mm / .223 Remington

| | |
|-----------------|---------|
| Bullet diameter | 5.7 mm |
| Case length | 44.7 mm |
| Overall length | 57.4 mm |

FAMAS F1

The FAMAS (Fusil d'Assaut de la Manufacture d'Armes de Saint-Étienne) F1 bullpup rifle was developed in France in the late 1960s and entered into service with the French armed forces in 1975. More than 400,000 units have been produced. It remains the service rifle of the French military, though production of the FAMAS F1 ceased in 2000.

| | |
|-------------------------|---------------------------------------------------------|
| Category | <i>Assault Rifles</i> |
| Operating system | delayed-blowback, selective-fire and 3rd burst facility |
| Cartridge | 5.56 x 45mm / .223 Remington |
| Length | 757 mm |
| Feeding | detachable box magazine |

The following ammunition can be used by the **FAMAS F1**:

5.56 x 45mm / .223 Remington

| | |
|-----------------|---------|
| Bullet diameter | 5.7 mm |
| Case length | 44.7 mm |
| Overall length | 57.4 mm |

FN FAL

The FN FAL (Fusil Automatique Léger - Light Automatic Rifle) is one of the most famous and widespread military rifle. Because of its prevalence and widespread usage among the militaries of many NATO and first world countries during the Cold War, it received the title "The right arm of the Free World". It can be found in both, the 7.62x51mm and, very rarely, the 5.56x45mm NATO versions. The furniture may be wood, metal or plastic. There are various barrel lengths. In the UK (L1A1), Canadian, Indian and Netherland versions, there is no automatic fire mode. The gas system is fitted with gas regulator so it could be easily adjusted for various environment conditions, or cut off completely so rifle grenades could be safely launched from the barrel.

| | |
|-------------------------|-----------------------------------------------------------------------|
| Category | <i>Assault Rifles</i> |
| Operating system | Gas operated, tilting breechblock, select-fire or semi-automatic only |
| Cartridge | 7.62 x 51mm / .308 Winchester |
| Length | 1100 mm |
| Feeding | Box magazine |

The following ammunition can be used by the **FN FAL**:

7.62 x 51mm / .308 Winchester

| | |
|-----------------|----------|
| Bullet diameter | 7.82 mm |
| Case length | 51.18 mm |
| Overall length | 69.85 mm |

FN Herstal FN MAG

The Belgian FN MAG (Mitrailleuse d'Appui Général, meaning general-purpose machine gun) entered into production in 1958. It is one of the most widespread machine gun designs and is used in more than 90 countries around the globe. It is still manufactured in Belgium and produced under license in several countries including Argentina, Egypt, the US and the UK. It can be carried by infantry and is usually fired while mounted on a tripod.

| | |
|-------------------------|--------------------------------|
| Category | <i>Heavy Machine Guns</i> |
| Operating system | gas, automatic |
| Cartridge | 7.62 x 51mm / .308 Winchester |
| Length | 1260 mm |
| Feeding | disintegrating metal link belt |

The following ammunition can be used by the **FN Herstal FN MAG**:

7.62 x 51mm / .308 Winchester

| | |
|-----------------|---------|
| Bullet diameter | 7.82 mm |
|-----------------|---------|

| | |
|----------------|----------|
| Case length | 51.18 mm |
| Overall length | 69.85 mm |

GDATP MK 19

The MK 19 or Mark 19 grenade machine gun was designed in the 1960s for the US Navy in the Vietnam War. In the following decades, the MK 19 was further improved, sold to and adopted by at least 28 other nations including Australia, Chile and South Korea. It was originally designed to be mounted on (naval) vehicles, but current systems can also be ground- or turret-mounted. The MK 19 can be fired manually or even remotely. Original manufacturer General Dynamics Armament and Technical Products (GDATP).

| | |
|-------------------------|----------------------------------------------------------------|
| Category | <i>Hand-held under-barrel and Mounted Grenade Launchers</i> |
| Operating system | blowback, open-bolt (advanced primer ignition in mods 1 and 2) |
| Cartridge | 40x53 mm |
| Length | 1095 mm |
| Feeding | linked belt with 32 or 48 rds |

The following ammunition can be used by the **GDATP MK 19**:

40x53 mm

| | |
|-----------------|-------|
| Bullet diameter | 40 mm |
| Case length | 53 mm |
| Overall length | - |

HK G3

The G3 constructed from Heckler & Koch (H&K) in cooperation with a Spanish agency Centro de Estudios Técnicos de Materiales Especiale (CETME) in the beginning Model A & B, after further development, West German Army (Bundeswehr) implemented this rifle. The furniture can be wood or plastic. The plastic stock may be green, sand or

black. There is also a collapsing stock. The rifle is hammer fired and has a trigger mechanism with a 3-position fire selector switch that is also the manual safety toggle that secures the weapon from accidentally discharging.

| | |
|-------------------------|-------------------------------|
| Category | <i>Assault Rifles</i> |
| Operating system | Roller-delayed blowback |
| Cartridge | 7.62 x 51mm / .308 Winchester |
| Length | 1023 mm |
| Feeding | Box magazine |

The following ammunition can be used by the **HK G3**:

7.62 x 51mm / .308 Winchester

| | |
|-----------------|----------|
| Bullet diameter | 7.82 mm |
| Case length | 51.18 mm |
| Overall length | 69.85 mm |

MAS 49

The MAS-49 is a French semi-automatic rifle that replaced various bolt action rifles as the French service rifle. The MAS-49 and MAS 49/56 use a direct gas impingement system with no gas piston. In this system gas is vented from a port on top of the barrel and piped directly into an open cylindrical hollow located in front and on top of the bolt carrier. The system has the advantage of not depositing gas fouling on the bolt itself, a separate part located underneath the bolt carrier. Many MAS-49/56 rifles were imported as surplus in the USA and had been rechambered to fire the 7.62x51mm NATO round.

| | |
|-------------------------|------------------------------|
| Category | <i>Rifles & Carbines</i> |
| Operating system | Gas operated, tilting bolt |
| Cartridge | 7.5 x 54mm |
| Length | 1100 mm |
| Feeding | Box magazine |

The following ammunition can be used by the **MAS 49**:

7.5 x 54mm

| | |
|-----------------|--------|
| Bullet diameter | 7.8 mm |
| Case length | 54 mm |
| Overall length | 78 mm |

MAS 49/56

The MAS-49 is a French semi-automatic rifle that replaced various bolt action rifles as the French service rifle. The MAS-49 and MAS 49/56 use a direct gas impingement system with no gas piston. In this system gas is vented from a port on top of the barrel and piped directly into an open cylindrical hollow located in front and on top of the bolt carrier. The system has the advantage of not depositing gas fouling on the bolt itself, a separate part located underneath the bolt carrier. Many MAS-49/56 rifles were imported as surplus in the USA and had been rechambered to fire the 7.62x51mm NATO round.

| | |
|-------------------------|------------------------------|
| Category | <i>Rifles & Carbines</i> |
| Operating system | Gas operated, tilting bolt |
| Cartridge | 7.5 x 54mm |
| Length | 1020 mm |
| Feeding | Box magazine |

The following ammunition can be used by the **MAS 49/56**:

7.5 x 54mm

| | |
|-----------------|--------|
| Bullet diameter | 7.8 mm |
| Case length | 54 mm |
| Overall length | 78 mm |

MAT 49

For some 30 years, the MAT 49 was widely used by French military and police forces; it was used throughout the Indochinese and Algerian campaigns. The weapon can still be encountered in former French colonies in Africa and Indochina. It should be noted that North Vietnam once produced a local copy of the MAT 49, chambered for 7.62mm TT rounds. MAT 49s manufactured for police forces, had two triggers, allowing use of full-auto fire or single shots, but most were manufactured as full-auto only.

| | |
|-------------------------|--------------------------------------------------|
| Category | <i>Submachine Guns</i> |
| Operating system | Blowback-operated, fired from open bolt |
| Cartridge | 7.62 x 25mm Tokarev 9mm Parabellum (9 x 19mm) |
| Length | 404 mm |
| Feeding | Box magazine |

The following ammunition can be used by the **MAT 49**:

7.62 x 25mm Tokarev

| | |
|-----------------|--------|
| Bullet diameter | 7.8 mm |
| Case length | 25 mm |
| Overall length | 34 mm |

9mm Parabellum (9 x 19mm)

| | |
|-----------------|----------|
| Bullet diameter | 9 mm |
| Case length | 19.15 mm |
| Overall length | 29.69 mm |

Mossberg 500

The Mossberg 500 is a series of pump-action shotguns manufactured by the American company O.F. Mossberg & Sons. These shotguns have been produced since 1960 and with a series of different models including the numbers 505, 510, 535, and 590. The Mossberg 500 shotgun series is designed to be used under harsh field conditions, as it is easy to clean and to maintain.

| | |
|-------------------------|------------------------------|
| Category | <i>Rifles & Carbines</i> |
| Operating system | manual, slide-action |
| Cartridge | 12-gauge |
| Length | 1022 mm |
| Feeding | underbarrel tubular magazine |

The following ammunition can be used by the **Mossberg 500**:

12-gauge

| | |
|-----------------|----------|
| Bullet diameter | 18.53 mm |
| Case length | - |
| Overall length | - |

Norinco Type 81

The Norinco Type 81 assault rifle entered into production and service in the early 1980s and is still being produced and offered for export sale. Its design and operating system incorporates elements of the Dragunov SVD, Simonov SKS, and AK-47 series rifles.

| | |
|-------------------------|---------------------------------|
| Category | <i>Assault Rifles</i> |
| Operating system | gas, selective-fire |
| Cartridge | 7.62 x 39mm |
| Length | 955 mm |
| Feeding | detachable box or drum magazine |

The following ammunition can be used by the **Norinco Type 81**:

7.62 x 39mm

| | |
|-----------------|---------|
| Bullet diameter | 7.92 mm |
| Case length | 38.7 mm |
| Overall length | 56 mm |

RPD

The RPD (Ruchnoy Pulemet Degtyarova - Degtyarov Light MG) was one of the first weapons designed to fire a new, intermediate cartridge 7.62x39mm. During its service life, the weapon was modernized several times.

The weapon was in service with several armed forces, both regular and irregular, and it can be found in many countries in Asia and Africa.

| | |
|-------------------------|------------------------------|
| Category | <i>Light Machine Guns</i> |
| Operating system | Gas operated, full auto only |
| Cartridge | 7.62 x 39mm |
| Length | 1037 mm |
| Feeding | Boxed belt |

The following ammunition can be used by the **RPD**:

7.62 x 39mm

| | |
|-----------------|---------|
| Bullet diameter | 7.92 mm |
| Case length | 38.7 mm |
| Overall length | 56 mm |

RPG 2

The RPG 2 design is based on the German Panzerfaust anti-tank weapon developed during World War II. It was made under license by many companies in many countries (e.g. the B-40 in Vietnam), it was exported to many countries, and it can be found all over the world because the gun is used in many conflicts. The weapon was in service with several armed forces, both regular and irregular, and it can be found in many countries in Asia and Africa.

| | |
|-------------------------|----------------------------------------|
| Category | <i>Portable Anti-tank Guns</i> |
| Operating system | Recoilless launch / non rocket booster |
| Cartridge | |
| Length | 650 mm |
| Feeding | front-loaded |

The following ammunition can be used by the **RPG 2**:

RPG 7

The RPG 7 was made under license by many companies in many countries, it was exported to many countries, and it can be found all over the world because the gun is used in many conflicts. The weapon was in service with several armed forces, both regular and irregular, and it can be found in many countries in Asia and Africa.

| | |
|-------------------------|------------------------------------|
| Category | <i>Portable Anti-tank Guns</i> |
| Operating system | Recoilless launch + rocket booster |
| Cartridge | |
| Length | 650 mm |
| Feeding | front-loaded, manual reload |

The following ammunition can be used by the **RPG 7**:

RPK

The RPK was made under license by many companies in many countries. It was exported to many countries, and it can be found all over the world because the gun is used in many conflicts. The weapon was in service with several armed forces, both regular and irregular, and it can be found in many countries in Asia and Africa.

| | |
|-------------------------|--------------------------------------------------------|
| Category | <i>Light Machine Guns</i> |
| Operating system | Gas operated, magazine fed, air cooled, selective fire |
| Cartridge | 7.62 x 39mm |
| Length | 1040 mm |
| Feeding | Box magazine |

The following ammunition can be used by the **RPK**:

7.62 x 39mm

| | |
|-----------------|---------|
| Bullet diameter | 7.92 mm |
| Case length | 38.7 mm |
| Overall length | 56 mm |

SIG SG540

The Swiss SIG SG540 was designed as a potential replacement for the SG510. It was produced between 1977 and 2002 in Switzerland and remains in production in Chile only. While the SG540 and the SG 543 models are chambered for the 6.56 x 45 mm caliber, the SG542 uses 7.62 x 51 mm NATO cartridges.

| | |
|-------------------------|------------------------------|
| Category | <i>Assault Rifles</i> |
| Operating system | gas, selective-fire |
| Cartridge | 5.56 x 45mm / .223 Remington |
| Length | 950 mm |
| Feeding | detachable box magazine |

The following ammunition can be used by the **SIG SG540**:

5.56 x 45mm / .223 Remington

| | |
|-----------------|---------|
| Bullet diameter | 5.7 mm |
| Case length | 44.7 mm |
| Overall length | 57.4 mm |

Steyr AUG

The rifle is fully ambidextrous. It can be configured for use by left-handed shooters by simply changing the bolt for a left-handed one with the extractor and ejector on opposite sides, and moving a blanking cap from the left ejection opening to the right. The housing of the AUG rifles, integral with the pistol handle and trigger guard, is made from the high impact-resistant polymer, and is usually of green or black color. The Australian Army's modified version of the Steyr AUG A1 is called F88 Austeyr. It is also used by the Falklands Defense Forces.

| | |
|-------------------------|-----------------------------------------------------------|
| Category | <i>Assault Rifles</i> |
| Operating system | Gas operated, rotating bolt |
| Cartridge | 5.56 x 45mm / .223 Remington 9mm Parabellum (9 x 19mm) |
| Length | 790 mm |
| Feeding | Box magazine |

The following ammunition can be used by the **Steyr AUG**:

5.56 x 45mm / .223 Remington

| | |
|-----------------|---------|
| Bullet diameter | 5.7 mm |
| Case length | 44.7 mm |
| Overall length | 57.4 mm |

9mm Parabellum (9 x 19mm)

| | |
|-----------------|----------|
| Bullet diameter | 9 mm |
| Case length | 19.15 mm |
| Overall length | 29.69 mm |

Tagging of Sources

We believe that our Guide should be as transparent as possible without endangering the confidentiality of our sources. Rather than name the exact source for each unit of data, we have created tags so that users can at least know whether the data comes from a primary or secondary source, and by which medium it can or has been found. All incoming data is validated and then tagged by the project team at BICC before it enters our database.

Sources are tagged according to the following criteria:

1. Primary Sources:

These are presentations of facts. They are proof of an SALW event (e.g. a transfer, sighting, misuse, etc.) because the source was created at the time of the event itself. Primary sources are usually original documents such as transfer authorizations, firearms legislation, or academic journals presenting results of a study on SALW holdings in a particular country, for example. However, they can also be information offered by a person with direct knowledge of an SALW event or who has documented an SALW event at the time that it happened.

2. Secondary Sources:

These are interpretations or evaluation of facts. Secondary sources contain commentary and analysis of SALW events that are documented in primary sources.

Sources are also tagged according to the dominant medium of delivery:

A. Written - the source is based on written words.

B. Oral - the source is based on spoken words.

C. Visual - the source is based on seen events or optical images.

These criteria make our tags two-dimensional. While the process of classifying sources is a primarily subjective one, the project team at BICC has developed the following table to serve as an example of possible sources within each category.

Table: Examples of sources on SALW distribution

| | Primary | Secondary |
|--|---------|-----------|
|--|---------|-----------|

| | | |
|----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Written | <ul style="list-style-type: none"> • Fact books • Weapons Transfer authorizations • End-user certificates • Transcripts of interviews, legal proceedings, speeches/ presentations, meetings, conferences or symposia • Newspaper articles • Written correspondence (e.g. letters, emails, text messages, etc.) • Blogs • Peer-reviewed journal articles • Treaties, constitution, laws • Records of organizations (e.g. annual reports) • Surveys, questionnaires <p>Etc...</p> | <ul style="list-style-type: none"> • Wikipedia • Literature reviews • Training or safety manuals on gun control, ammunition, physical stockpile security management) • Minutes of meetings, conferences, symposia • Indexes (e.g. Global Militarization Index) • Newspaper articles <p>Etc.</p> |
| Oral | <ul style="list-style-type: none"> • Interviews with experts, including radio or telephone • Legal proceedings • Speeches or interventions by experts or national representatives in government or international meetings <p>Etc ...</p> | <ul style="list-style-type: none"> • Speeches, panel presentations, etc. on data provided by experts <p>Etc...</p> |
| Visual | <ul style="list-style-type: none"> • Artifacts (e.g. the weapons themselves, ammunition) • Photographs of weapons, ammunition, etc. • Videos (e.g. YouTube, those recorded by mobile phone) • Television documentaries, news reports <p>Etc ...</p> | <ul style="list-style-type: none"> • PowerPoint presentations on results found by experts <p>Etc...</p> |

Table: Example tags

| Source (sample) | Type of source | Medium of delivery |
|-----------------------------------------------------------|----------------|--------------------|
| IHS Jane's Weapons Infantry (2015-2016) | primary | written |
| Panel discussion of weapons use of non-state armed groups | secondary | oral |
| Documentary on paramilitaries in Colombia | primary | visual |

About the Guide

The Interactive Guide on **Small Arms and Light Weapons** is an open access tool, designed to build knowledge on how to identify different types, makes and models of commonly used SALW in organized violence; to collect data on the global and country-specific spread of these SALW; and to describe some of their visual and technical specifications.

The guide is not an exhaustive list of all SALW that are used around the world.

Global SALW control relies on, among other things, data and knowledge of the weapons themselves. Our aim is that the Guide will be used to support national reporting duties on SALW holdings; facilitate and ameliorate the collection of data on SALW; and increase general knowledge of global distribution of SALW.

The interactive Guide was developed by **BICC** in close cooperation with the **Bundeswehr Verification Center** (BwVC), and with the generous support of the *Federal Foreign Office, Germany*.
